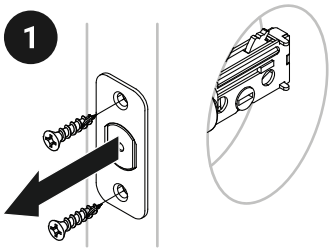
# Deadbolt Go
## Quick Start Guide

v1.0

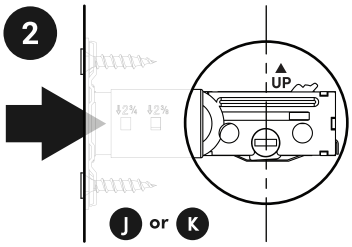
# Hello!
## Start Here

**1**



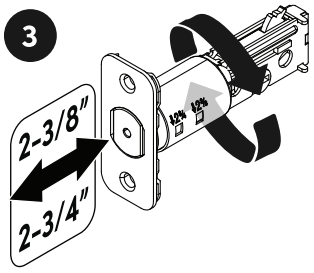
Remove existing deadbolt from your door.

**2**



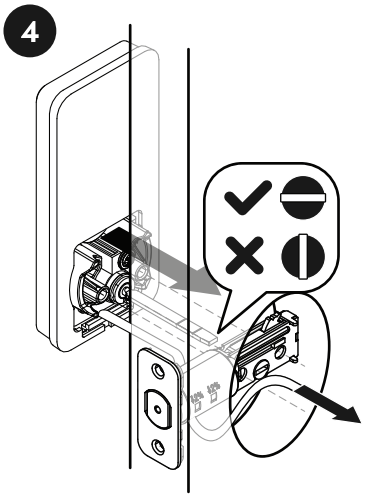
Install deadbolt latch into the door ensuring alignment as shown, with "UP" towards top.

**3**



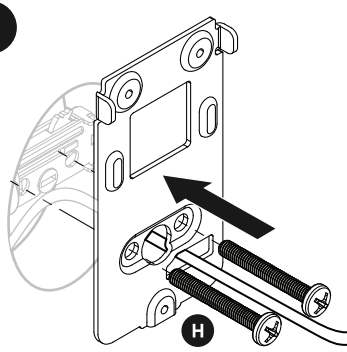
If required, increase the length of the deadbolt by twisting it before inserting into door.

**4**



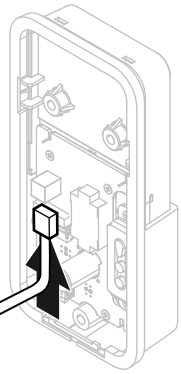
Assemble the keypad body. The tailpiece should be in the horizontal orientation.

**5**



Insert cable through hole in the mounting plate. Fasten it to the keypad body with 2 x "H" screws.

**6**



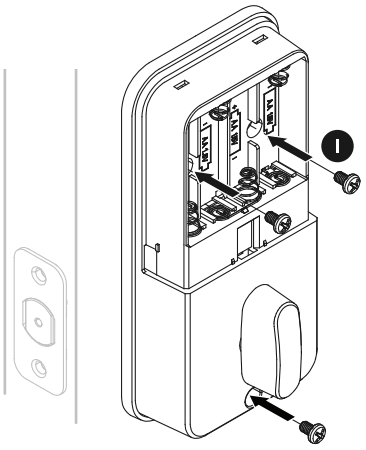
Remove battery cover. Connect cable to thumbturn body.

**7**

Fasten thumbturn body to mounting plate with the 3 x "I" screws and fold cable into empty space inside body.

**8**

Rotating the thumbturn should lock & unlock the deadbolt with ease. Adjust/Install the strike & dust box if needed.

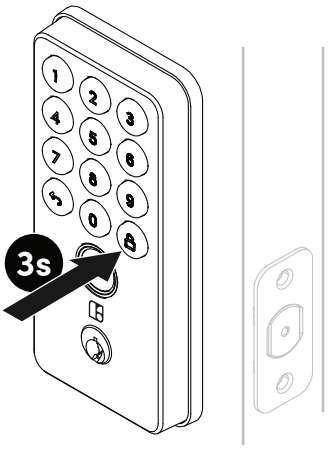


**9**

Insert 4 x AA batteries (not included) and replace the battery cover.

**10**

Long press the lock button and your lock will automatically calibrate to the left or right side of the door.



**Congrats! You have installed your lock.**

Download the igloohome application from the App Store or Google Play Store to complete setup & configure your smart lock.
