WOLFLOK

The Wolflok Range

Maximum security mechanical lock boxes

Keep your keys secure and accessible at the point of need with a maximum security lock box— a durable, wall-mounted solution designed for safe and convenient key storage. Wolflok lock boxes offers a reliable way to share and manage access without compromising security.

Say hello to the Wolflok range

The **Wolflok** range features maximum security, attack resistant mechanical lock boxes, making sharing keys super safe and hassle-free.

Millions of hard-to-crack code combinations, illuminated buttons for easy night time access, one handed operation and plenty of room for keys, fobs and cards. We took security and convenience and raised it to a whole new level.

Certified by industry professionals

To ensure **Wolflok** lock boxes provide maximum security and peace of mind, we partner with a world-renowned independent attack test house, BRE. They rigorously test our lock boxes against the LPS1175 standard, ensuring they meet the highest levels of protection.

Attack tested | Most secure | 5 year guarantee* | Highly durable

This determines how long it takes to break into the lock box using tools that a common home invader would carry. The main tests are prying off the wall and getting into the product.

LPCB LOSS PREVENTION CERTIFICATION BOARD
UKAS MANAGEMENT SYSTEMS 0007
Assessed to ISO 9001:2015
Cert/LPCB ref. 1004

*2 years standard, 5 years when registered on wolflok.com - illumination module not included.

Everything you need to know about the **Wolflok** range

A world-first multi-push keypad

The **Wolflok** range has a multi-push mechanism which has taken code security to a whole new level.

Our unique multi-push keypad means each digit can be used in a code up to 4 times, creating an impressive 9.7 million possible code combinations (we've done the math). No other lock box comes close.

It also means choosing a memorable code has never been easier. Thanks to the freedom of multi-push technology, you can pick a longer code that includes repeated numbers, allowing you to set one that you can easily remember.

Patented illumination technology

The **Wolflok** range features a patented illumination module that lights up the easy-press buttons and the internal compartment - so you can come or go, night and day.

- Battery powered illumination - no additional power required
- Maximum visibility with large backlit buttons
- Fast, secure access to your home around the clock
- The key lock box can be opened and closed without activating the lights

The illumination module means **Wolflok** lock boxes are particularly suited to users who wish to use the key lock boxes in all lighting conditions.

Crime prevention

Designed to prevent unauthorized access and withstand malicious attacks, built using robust materials and advanced locking mechanism.

Created for easy use

We've designed the **Wolflok** range with comfort in mind.
The large, backlit easy-press buttons make using the key lock box simple, even for the less dexterous. No more fiddly buttons - just effortless access.

How can Wolflok Pro be used?

The **Wolflok** range of key lock boxes have many applications including access for domestic homes, security services, key holding agencies and facilities management companies, remote sites, property management, equipment storage, after-hours delivery, alarm or emergency access, as well as providing secure storage for spare keys and emergency entry if you are locked out or have lost your keys.

Key features of the **Wolflok** range

Attack resistant

Featuring hardened anti-saw reinforcement pins, coned, anti-drill hinge pins, a clamshell anti-prise design with an additional advanced anti-pick mechanism, providing unrivalled security.

Illuminated buttons and vault

Clear visibility day and night thanks to our patented illumination technology. No additional power source required.

Ultra high code security & multi-push buttons

Patented multi-push keypad allows the same button to be pressed up to 4 times, resulting in 9.7 million possible.

Easy installation

All fixtures and fittings required are provided in the box, as well as a simple marking template to ensure correct installation.

Comfortable Use

Large 7mm (0.27 inches) soft-touch illuminated buttons, ergonomic knob and hinged lid allow easy one handed use for all ages and dexterities.

Longevity & reliability

Made from Zinc Alloy known for its strength, anti-corrosive properties and attack resistance.

Large capacity

Two internal hooks keep keys tidy with plenty of room for up to 6 keys, fobs and access cards. You can easily and safely retrieve and replace your keys without the hassle of them falling out.

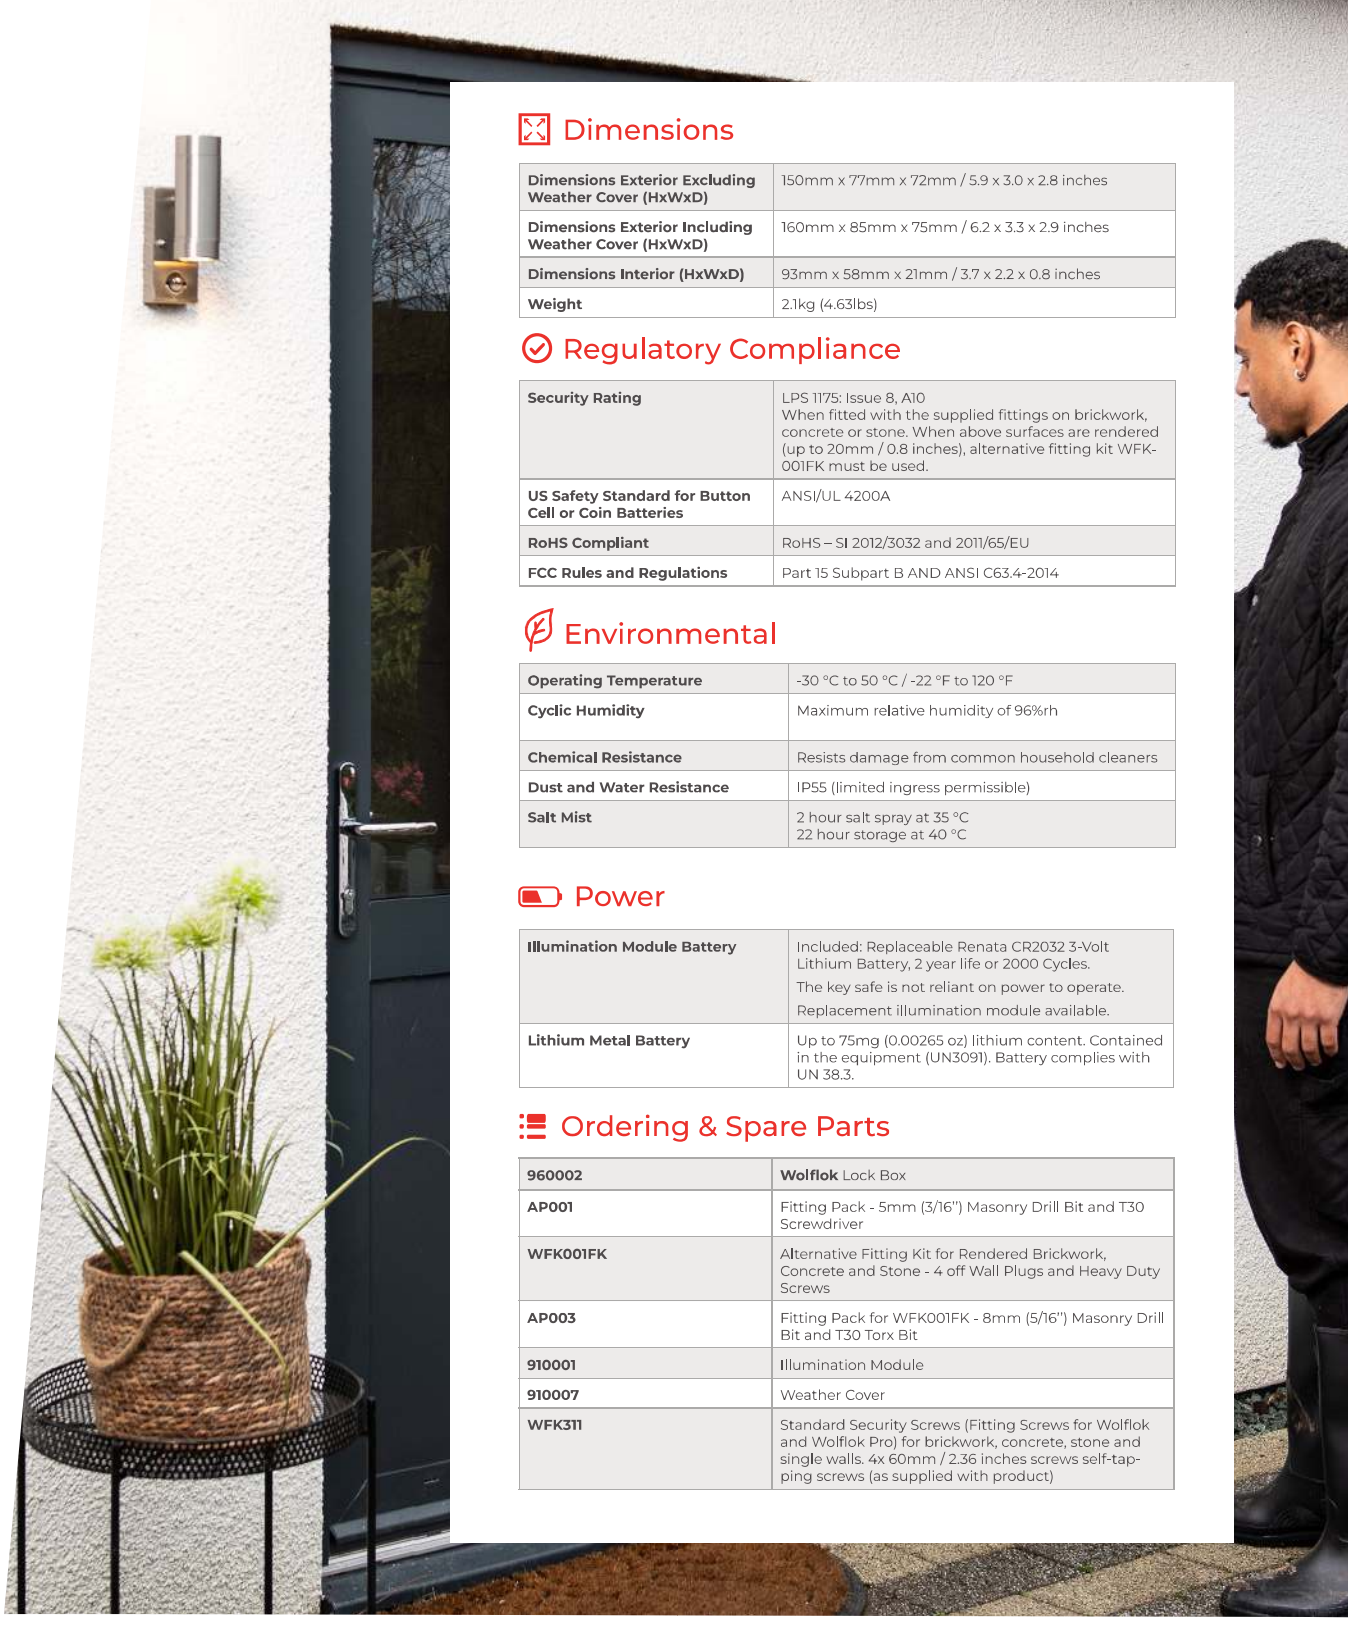
All weather durability

Wolflok is rust and water resistant with a weather resistant cover made from toughened plastic for further protection, designed for outdoor use.

WOLFLOK

The original maximum security mechanical lock box

The original **Wolflok** concept was created following intensive research, testing and development. The patented technology features advanced, world class anti-pick, anti-anti-tamper and anti-pry mechanisms, simply incomparable to a standard key lock box.



Dimensions

Dimensions Exterior Excluding Weather Cover (HxWxD)	150mm x 77mm x 72mm / 5.9 x 3.0 x 2.8 inches
Dimensions Exterior Including Weather Cover (HxWxD)	160mm x 85mm x 75mm / 6.2 x 3.3 x 2.9 inches
Dimensions Interior (HxWxD)	93mm x 58mm x 21mm / 3.7 x 2.2 x 0.8 inches
Weight	2.1kg (4.63lbs)

Regulatory Compliance

Security Rating	LPS 1175: Issue 8, A10 When fitted with the supplied fittings on brickwork, concrete or stone. When above surfaces are rendered (up to 20mm / 0.8 inches), alternative fitting kit WFK-001FK must be used.
US Safety Standard for Button Cell or Coin Batteries	ANSI/UL 4200A
RoHS Compliant	RoHS – SI 2012/3032 and 2011/65/EU
FCC Rules and Regulations	Part 15 Subpart B AND ANSI C63.4-2014

Environmental

Operating Temperature	-30 °C to 50 °C / -22 °F to 120 °F
Cyclic Humidity	Maximum relative humidity of 96%rh
Chemical Resistance	Resists damage from common household cleaners
Dust and Water Resistance	IP55 (limited ingress permissible)
Salt Mist	2 hour salt spray at 35 °C 22 hour storage at 40 °C

Power

Illumination Module Battery	Included: Replaceable Renata CR2032 3-Volt Lithium Battery, 2 year life or 2000 Cycles. The key safe is not reliant on power to operate. Replacement illumination module available.
Lithium Metal Battery	Up to 75mg (0.00265 oz) lithium content. Contained in the equipment (UN3091). Battery complies with UN 38.3.

Ordering & Spare Parts

960002	**Wolflok** Lock Box
AP001	Fitting Pack - 5mm (3/16") Masonry Drill Bit and T30 Screwdriver
WFK001FK	Alternative Fitting Kit for Rendered Brickwork, Concrete and Stone - 4 off Wall Plugs and Heavy Duty Screws
AP003	Fitting Pack for WFK001FK - 8mm (5/16") Masonry Drill Bit and T30 Torx Bit
910001	Illumination Module
910007	Weather Cover
WFK311	Standard Security Screws (Fitting Screws for Wolflok and Wolflok Pro) for brickwork, concrete, stone and single walls. 4x 60mm / 2.36 inches screws self-tapping screws (as supplied with product)

WOLFLOK PRO

Maximum security mechanical lock box with enhanced security features

Enhanced security

Using the original **Wolflok** patented mechanism, the **Wolflok Pro** has been adapted with the ambition to create an even more secure lock box, designed with commercial security standards in mind.

The highest security rating in its class

The **Wolflok Pro** achieves LPS1175 Issue 8 A10 & B1 attack security rating from LPCB (Loss Prevention Certification Board) - meaning maximum security for your keys.

This was possible thanks to additional security features, including:

- Additional hardened anti-saw pins
- A stainless steel internal vault
