

Smart Locks

Turn your smart phone into your key. The intuitive Yale Access App lets you manage the access of your home remotely.*

*When used in conjunction with a Yale Connect Bridge

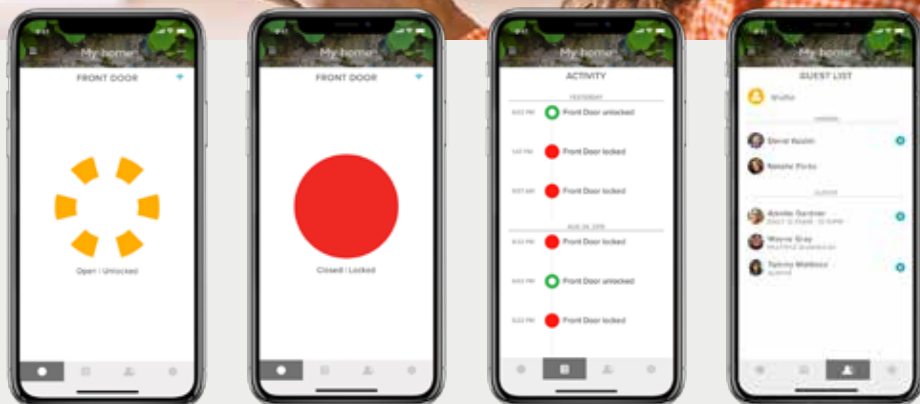

Yale Smart Locks deliver a premium digital locking solution with flexible control and peace of mind. Yale Smart Locks can now be controlled through the use of the Yale Access App, giving you total control over your lock via your mobile device.

Works with

The Yale Access functionalities

App control

Lock and unlock your door from your app, anywhere in the world when paired with the Yale Connect Bridge.

DoorSense™ technology

The lock will check the status of the door and tells you if your door is securely closed and locked.

Activity monitoring

Track visitor tails and check who unlocked/locked the door and when. Be notified of lock status at all times by setting up smart alerts.

Guest access

Grant virtual keys valid for a few weeks, a few hours or a few minutes. Never worry about lost or stolen keys again.

Grant entry from wherever you are with the Yale Access App

Remote access means you can let in family, friends and trusted visitors like the cleaner or dog walker – from anywhere – when an Yale Smart Lock is paired with Yale Connect Bridge. If someone forgets to lock when they leave, you can take care of it with the tap of a finger.

Expecting guests?
Send a virtual key

You can send virtual keys to friends, family or people you trust from the Yale Access App. Guests can come and go as they wish – and you don't need to worry about lost keys.

Know the ins and outs of your home

The 24/7 activity feed will help you check who is coming and when – even when you're not there. You'll know when guests have arrived, what time your children got home, and whether a tradesman or cleaner was in to get the job done.

Auto-lock and unlock as you come and go

The auto-lock feature can automatically lock your door when you leave, either immediately after closing or after a set amount of time via the Yale Access App. When you return, your door will auto-unlock using geo-fencing technology, so you don't need to fumble around with keys.

DoorSense™: for peace of mind

DoorSense™ is a technology which will let you know whether your door is securely closed. If anything unexpected happens, like the door being left ajar, you will be the first to know.

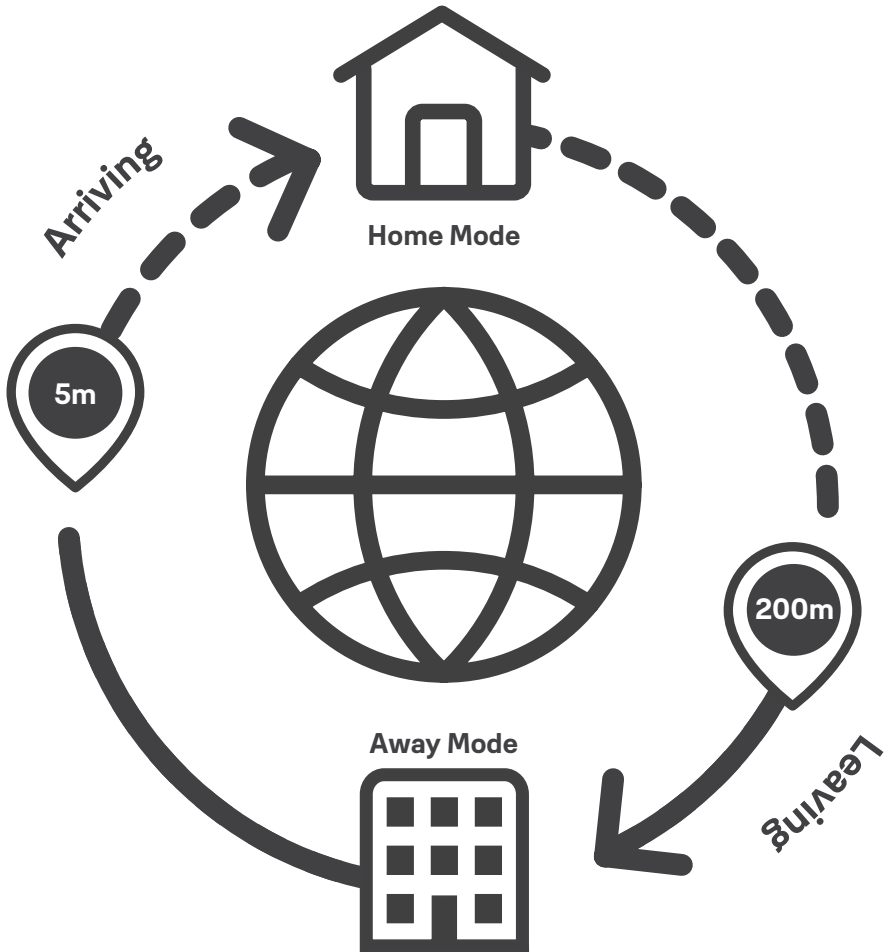

Use your voice to control your lock

Yale Access works with Amazon Alexa and Google Home. You can control your lock with your voice using Alexa or Google Assistant.

Open sesame

Otherwise known as auto-unlock.

Auto-unlock is one of the most popular and unique features for Yale Access users. Having your door automatically unlock when you approach home, without needing to reach for a key or your phone is like having your own personal doorman.

Auto-unlock relies on a few different technologies in your phone to understand your location. That includes Bluetooth, Wi-Fi, and GPS, in addition to the app. All of these systems are managed by your phone's operating system communicating with the app.

The app has two states that determine how auto-unlock works: Home and Away. When you're at home, your app will enter Home Mode and auto-unlock becomes inactive. As long as you are in Home Mode, your lock will not unlock

automatically. As soon as you leave your home, the app will get ready to switch into Away Mode. Before switching into Away Mode, the Yale Access App waits for you to move at least 200 metres away from your home. Once the app is in Away Mode, your lock will wait to automatically unlock when you return home.

As you return to within 200 metres of your home, your phone will start looking for your lock. Within 5 metres of your door, the app will find your lock, automatically unlock the door, and return to Home Mode.

Yale Unity Entrance Lock

The Unity Entrance lock is designed specifically for the Australian market, certified to Australian Standards, AS4145.2.2008, with patent digital deadlocking technology.

Using the Yale Access App, have keyless entry, see who's coming and when, grant virtual keys and check whether the door is open or closed.

Digital locking

Digitally deadlock your door through the secure lockset mode, securely locking from both inside and outside.

Total control via app

The Yale Access App allows you to lock and unlock your door, grant access to others and keep track of visitor access.

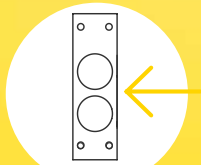

Tailor user access

Use either the Yale Access App, Yale Key Tags or upgrade with the Yale Smart Keypad to access your lock.

Auto unlock/lock

Auto unlock your door as you walk up without the need to take out your phone. The door position sensor tells you if your door is open or closed.

SUITABLE FOR FIRST-FIT

AND RETROFIT

Yale Connect Bridge

For voice assistant functionality and remote access and control of your lock.

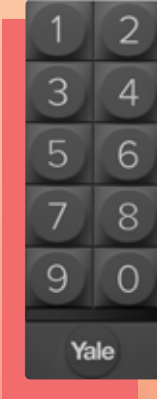

The Yale Connect Bridge is a white, square-shaped device with rounded corners. It features the Yale logo at the top, a small green LED indicator light in the center, and a circular lock mechanism at the bottom.

- **Control who has access**
Let visitors in and out when you aren't home.
- **Monitor access from anywhere**
Always know who is coming and when.
- **Keep your home secure**
Check if your door is locked from anywhere.
- **Enable voice assistant**
