Yale

Face or Palm Twice as Easy. **Yale Luna Elite+**

Step into the future of home security with the Yale Luna Elite+, a premium smart lock that brings convenience, visibility, and protection together—starting with its integrated smart doorbell. With a built-in camera, you can see who's at your door in real time, enjoy live video streaming, and receive instant alerts when someone approaches your home.

Powered by Yale Sentry Guard, the lock provides notifications and captures video footage if someone lingers at your doorstep, ensuring your home is always under watchful protection. It stores up to 20 motion-triggered video recordings locally with 8GB rolling storage, ensuring all footage stays on-device. Your biometric data is also securely stored locally, giving you complete privacy and peace of mind.

Beyond visibility, Yale Luna Elite+ redefines access with advanced biometric technology. Featuring Yale FaceScan, it uses 3D structured light to recognise your face with exceptional accuracy, even in low-light conditions. It also includes Yale PalmScan, one of the most secure and hygienic unlocking methods available, scanning the unique vein structure beneath your skin for authentication that cannot be duplicated. Simply hover your palm for fast, contactless access—just high-five your lock, and it unlocks instantly.

With built-in Wi-Fi and BLE, you can remotely control and monitor your lock, with seamless smart home integration—no hub required. Smart Dual-Battery Technology ensures continuous operation, intelligently managing power across two batteries to prevent unexpected shutdowns.

Completing the experience is a 4.7-inch touchscreen and a welcome light that illuminates your entrance, adding both safety and style to your home.
